Devdutta Nath

Greater Noida, Uttar Pradesh 203201 | 7838584790 | dev1527b@gmail.com | LinkedIn | GitHub

Summary

Computer Science student specializing in AI/ML with strong foundations in C++ and Data Structures & Algorithms. Experienced in building AI-powered applications using Python, React, OCR, Gemini Vision, and RAG, with 300+ coding problems solved and multiple hackathon participations.

Education

Galgotias University **Expected 2028**

B.Tech in Computer Science and Engineering (AI/ML) — CGPA: 8.4

Class XII: 80.1% (2023) | Class X: 92.6% (2021) — N.C. Jindal Public School

Technical Skills

- **Languages:** C++, Python, Java, JavaScript
- **DSA / Programming:** Data Structures & Algorithms, 290+ problems solved on LeetCode, 300+ across all platforms
- **Machine Learning / AI:** NumPy, Matplotlib, Tesseract OCR, Gemini Vision, RAG
- **Web Development:** React, Vite
- **Databases:** SQL, Firebase (Firestore)
- **Developer Tools / Cloud:** GitHub, Vercel, Railway, Cloudflare, n8n, Google AI Studio, VS Code, Antigravity

Projects

NutriScan | *React, Python, Tesseract OCR, Gemini Vision, RAG, Vercel* **August 2026**

- Built an AI-powered product-label compliance platform to help consumers identify missing or incorrect declarations required under Legal Metrology (Packaged Commodities) Rules.
- Implemented Tesseract OCR and Gemini Vision for label analysis, with a RAG pipeline referencing approximately 2,000 government-sourced data points to evaluate compliance.
- Deployed the React application on Vercel and ranked **top 34 among 400+ students** at the Smart India Hackathon internal round.

TirthSaathi | *React, Python, JavaScript* **February 2026**

- Built a pilgrimage crowd-management platform to address overcrowding and improve visitor identification and access at temple sites.
- Implemented face-scan based identification and temple ticket booking to support visitor management and streamline temple access.
- Developed the React frontend with Python and JavaScript backend logic and deployed the platform live.

AstroNote | *React, Java Spring Boot, YouTube API, LRC, Cloudflare, Vercel* **December 2025**

- Built a music-sharing platform that enables artists to publish, discover, and connect with other artists through a centralized music community.
- Integrated YouTube APIs for music streaming and implemented synchronized live lyrics using the LRC format.
- Developed the backend with Java Spring Boot, deployed the frontend on Vercel with Cloudflare-hosted database, and tested the platform with **200+ concurrent users**.

Achievements

- Ranked in the **Top 34 out of 400+ students** for **NutriScan** at the **Smart India Hackathon (SIH) 2026** internal round and qualified for the national-level hackathon.
- Secured 3rd position for **AdFuse**, an advertisement-related project, at a hackathon.
- Participated in the Quant Craft Hackathon.
- Participated in the GDG Hackathon.

Certifications

- Git Fundamentals
- AI Fundamentals — OpenAI
- Prompt Engineering — OpenAI
- AI Fundamentals — Microsoft
